Tualatin-Sherwood Rd: Martinazzi Ave to I-5

Project Description:

The purpose of the project is to improve intersection operations and safety to address known capacity issues at this location, while also improving pedestrian and bicycle safety. The project includes several strategic changes to improve predictability and safety for everyone:

- Remove planted median to allow for a longer center vehicle lane
- Restripe existing lanes
- Install new signage to let drivers know which lane to use
- Changes to the bike lane on Nyberg Street
- Improve biking connection between Tualatin-Sherwood Road and the Tualatin River Greenway by adding buffered bike lanes on Boones Ferry Road and wayfinding signage. This connection is important because the project is not adding bike lanes where they are missing on Tualatin Sherwood Rd.

Project Schedule:

Planning and Outreach: Summer 2019- Spring 2020

Design: Spring- Summer 2021

Construction: Winter 2021- Spring 2022

This project addresses

Traffic Congestion

- ✓ Adds vehicle capacity
- ✓ Optimizes lane configuration
- ✓ Addresses pedestrian safety and bicycle access

Tualatin MOVING FORWARD
TRAFFIC FLOW – NEIGHBORHOOD SAFETY
