

93rd Ave Improvements

Project Description:

As part of the 95th and Avery project, we've heard concerns from some neighbors about cut-through traffic, speeding, and pedestrian safety on 93rd Avenue. We need your help to identify which specific changes make most sense for this street. Depending upon available budget, possible changes could include constructing sidewalks on one or both sides of the north end of 93rd Avenue, or implementing traffic calming measures, such as a driver feedback sign, speed humps, or converting the street to one way (southbound).

What street changes make most sense along 93rd Avenue?

Take this 5-minute survey by January 22.

www.surveymonkey.com/r/93rdAve

Community feedback identified the top concerns in the project area:

1. People speeding in vehicles
2. Gaps in the sidewalk
